International Morse Preservation Society

"Accuracy Transcends Speed"

- Further the use of CW
- Encourage newcomers to use CW
- Engender friendships among members

"When You've Worked A FISTS , You've Worked A Friend"

NORTH KEYNOTE *AMERICAN*

Slow Traffic Net: Tuesday & Thursday 9pm EST on 3.682
Century Award Net: Sunday 2000Z on 14.058MHz

Slow Ragchewing Group: W8B1 8pm EST Wed on 3.720
Saturday QSO Groups: 14.058 at 2000Z and 7.058 at 2300Z

Please keep watch on the Novice Bands and frequencies ending in .x58 (.058, .158, .258 etc)
Accuracy Transcends Speed **Courtesy At All Times**

Hello FISTS! I hope you had a terrific holiday season and things are getting back to the old routine for you. I still have my Christmas tree up, but taking it down is the next thing on the agenda after the Keynote gets to the printer. I really hate to take it down, I spent three evenings putting the lights on. Instead of stringing them around the tree in a circular fashion, I went wrapped each branch separately. It took forever, but looked wonderful because you couldn't see the wire from the light strands. I have the feeling it's going to take me at least three days to remove them, too.

Geo took a break this month and didn't write a KeyNote, so I took advantage of having the extra room by including a membership roster. The roster includes both the DX and North American FISTS and runs ten pages, so I had to cut back on the regular text of the newsletter. I have a whole pile of letters and info to include, but it will have to wait until the next issue. Sorry if I told you that something you sent to me would be in this issue - I just couldn't fit it all in.

Of course, the minute the list is published, it's obsolete because we're growing so quickly, but I hope it's a help to you. Please make a note of the callsigns in the 'corrections' and 'call changes' column on page 3 and make the necessary corrections on the list, which was printed before some of the corrections could be made. Thanks to Ed N7CFA for the work he puts into making and maintaining this list for FISTS!

We're starting out 1998 with a passing of the Awards Manager torch from Lee, N9NVV, to Joe, N3BHL. Lee has been our NAFAM for a few years now, and he thought it was time to give someone else an opportunity to get involved in the group - as well as give him some time to get on the air. Lee is still active in FISTS, he's donating the space for our popular Web page. I'm sure you join me in thanking Lee for all his work over the years. He was a terrific help in my keeping my sanity when we had the Century Rules Revision Revolt!

ISSUE #1, 1998

Please be patient while we make the paperwork transition from Lee to Joe. Joe's address is on the inside cover "How Do I..." list. Many thanks to Joe for agreeing to take over this very important FISTS appointment!

Send your logs for the Basic Century, QRP Century, WAS, and WAS/QRP to Joe. If you are claiming the Gold, Diamond or Platinum award, send your logs directly to England. Those awards are issued directly from England, so please include sufficient return postage for the certificate from England.

Randy, K8EZ, who took care of making and distributing the FISTS Club Presentation packages has decided to get out of the ham radio hobby and even sell his equipment. If anyone would be interested in taking over this job, please let me know. It involves sending out the presentations and sample newsletters to people who request it. It would be handy if you had Email capability, but not necessary. A big Thank You to Randy for designing our Presentation package. Those of you who have used it know what a super professional kit it is! It's resulted in many new FISTS members and has enlightened many people who otherwise wouldn't know about FISTS about the club.

We are sponsoring the Novice Round Up the weekend of Feb 13. It would be great to have this be a success, so please help out by spreading the word - post it on packet, put it in your local club newsletters and repeaters, wherever you think Novices and Techs might be hanging out. The problem really isn't getting people to work the Novice/Techs, it getting the Novice/Techs on the air!

The Century Award Net has been revamped with a rotation Net Control Station setup that includes NCS from different geographic locations in the country. One week out of the month, you should be able to have a NCS hear you - check in and check it out! I've been able to check in the last couple weeks, so hope to see you there! On with your KeyNote....

FISTS CW CLUB NEWSLETTER

Welcome to the New FISTS

CORRECTIONS

David #4009 is N9VPZ, not N0VPZ.
 John #4144 is WA5KOI, not WA5LOI
 Phil #4135 is W1RFW, not N1RFW

CALL CHANGES

Bob #3474 was KC5HLO, is now K5EYE.
 Jeff #3100 was VA3JEF, is now VE1JFA
 Kevin #3993 was KF6MBG, is now KQ6TV
 Dwight #2765 was KB9JAI, is now W9YQ
 Herb #3861 was N4UE, is now W3HL
 Richard #1990 was KC7LSO, is now KK7LB
 Jan #3934 was KB0WQT, is now N0QT
 Jim #3562 was KB0RGU, is now N0WE

CONGRATULATIONS!

...To Dwight **W9YQ** (KB9JAI) #2765 on his upgrade to Extra
 ...To Richard **KK7LB** (KC7LSO) #1990 on his upgrade to Advanced!
 ...To Jan **N0QT** (KB0WQT) on making Extra!

WANTED:

Indecent Language Ham Recordings

One of the goals FISTS member Joe Falcone N8TI has during his term as ARRL Great Lakes Director is to take those who use indecent language off the amateur bands. Joe is looking for tape recordings of alleged offenders to use as proof to the FCC that the problem is nationwide.

The tapes have to be of good quality and clearly demonstrate that a violation has taken place. The best way to do this is make a direct connection between your receiver and the tape recorder.

Send the tape to Joe Falcone, 9614 Arden Ave, Livonia MI 48150. Be sure to include information about the transmission - frequency, time, date along with your name and any information you may have of the alleged offender.

January Photopage Winner

The photopage winner for January 1998 is **WA8BIJ**, Vince. Vince wins a FISTS patch and stickers, just for sending in his photo for our photopages. You can have a chance at being our lucky winner by sending your photo (with your face about the size of a quarter) to Ken W8ROG at the address on the inside cover "How Do I..." Photos cannot be resized or returned.

FISTS 10th Anniversary Special Event

The list below was compiled from the letters, logs, and e-mails that were sent to Nancy, **WZ8C**, after the FISTS 10th Anniversary Special Event. Apologies to anyone who sent in a report and is not included.

This was a fun event and I know that there are many, many stations that participated and are not mentioned here. I had a great time with this and made lots of memorable QSO's. Heard lots of FISTS and non-FISTS members having a wonderful time making new friends during this Special Event.

Rag chewing seemed to be the plan of the day and at the close of the weekend I don't believe there was a loose thread, frayed hem, or ragged edge to be found. Listed alphabetically by call sign.

Special Event Soap Box It was fun being the object of a pile-up. (Art W8PBO) Had a blast, worked 15 meters, lots of action on the band. (Becky KF6GUH/FSE) Conditions were great with most RST at 599. (Roger KT4YY) All fun QSO's. Some quite long winded. (Bert

W4JTU) Seven of my eight contacts were made in the Novice bands. (Sam KB8OOM) I could not devote full time to our special event as the coast line of Calif. made WX history . . . we had a hurricane heading for San Diego. (Ernie KD6VMY) I worked six stations on Novice band but no Novices. (Jess AI9L) I may have set a record for the fewest QSO's during the FISTS special event weekend, (1). (Bob W1ZZL) Near the end of the special event I had a QSO with non-FISTer, Randy, KS4L, and he asked if I'd be his sponsor. (Don W7GB) That is the first CW special event I have ever participated in. It was great fun. (Virginia KC5SAM) I concentrated my work in the novice band, my first time there in awhile. It was fun. (Bill N2WG) Can we come up with an excuse to do this again sometime? (John K3WWP) I agree with John, K3WWP. Let's do this again sometime soon! Thanks to all who sent in logs, letters, e-mails and comments. Dennis K6DF

NOVICE ROUNDUP

Novice Round-Up, sponsored by FISTS CW Club will be held starting Friday Feb 13 at 1700 UTC to Monday Feb 16 2400 UTC.

Novice/Tech stations get points for working anyone. Above Tech get points only for working Novice/Tech stations. No repeater contacts.

Count 2 points for CW and 1 point for Phone. Exchange: Call Sign, Name, RST, License Class, QTH. Total of 50 multipliers, one for each state worked.

Score = (number of CW QSO's times 2, plus the number of Phone QSO's), times number of multipliers worked.

Certificates to the winners and the top scoring Novice and Non-Novice will get a one year free membership in FISTS CW Club.

Send Logs and summary sheets and check sheets to: NOVICE ROUND-UP, c/o Dennis Franklin K6DF, 4658 Capitan Dr., Fremont, CA., 94536-5448, postmarked no later than March 16, 1998.

We need your help to spread the word about our Novice Round-Up! Please put the information in your local club newsletters, talk to the Novice/Techs you know (or haven't had the chance to introduce yourself to yet) - invite them to your shack to get their feet wet in the Round-Up.

BE AN ELMER - IT'S A GOOD THING!

QRP With John Shannon K3WWP

A couple of issues ago I asked you to tell me about your most memorable QRP QSO, and I would tell you about mine. It is very hard to decide on just one.

I guess when you work the last of something, like the 50th state - or the first of something, like the 1st Asia QSO - those are ones that stick in our minds.

I remember working **4Z4DX** on 30M one evening for my first ever QSO with Asia, and my last continent. Another Asian QSO sticks in my mind - the first time I ever worked Japan. Here is the country with the most amateurs in the world, and I just couldn't work it, mainly because of the difficult path that passes through the auroral zone. Finally in the CQ WW DX contest in 1996, I made it. What a thrill to have **JA3ZOH** come back to me, and getting his QSL in just a couple of weeks. First QSO's on a particular band are also memorable. I remember well working **K3KLC** on 160M. I never thought you could do anything with QRP on that band, but I was wrong. I now have 40 states there. I also remember my first QSO on 12M with **K0OSW**. I remember that one because 12M was the last of the HF bands that I got on, and that one meant I now had QRP QSO's on all 9 HF bands.

My most memorable QSO of all came on 30M. On May 10, 1996 at 0036Z in the evening I was just calling my usual 3 X 2 CQ trying to get my QSO for that day keeping my streak of days with at least 1 QRP QSO going. After a few tries, a weak signal answered me. The call started with a V so I immediately thought it must be a VE6 or VE7, but the second letter wasn't an E or an A, it was a K. Well, I figured now it had to be an Aussie maritime mobile somewhere. No, he didn't sign slant anything after the call, just **VK6HQ**. I still couldn't believe it, and thought it was someone just fooling around. I went through with the QSO, and he was copying me very well, maybe a little better than I was copying him in my excitement. He gave his QTH as near Perth which I knew was in western Australia, and just about as far from my QTH as could be and still be on the Earth. We exchanged info for a few minutes, and said 73's. Now I wondered if it was legitimate.

I got my QSL in the mail the next day with an SAE and an IRC, and waited. In about a week or 10 days, I got a card back from John, and I knew then I had made a QRP QSO halfway around the world. There is a possibility the QSO was long path which would even add a little more to the distance that my signals travelled.

That's my most memorable one till something better comes along, and I doubt it will. I'd still like to hear about yours.

As we start the new year (it's Jan 3rd as I'm writing this), I'd like to say how gratifying it is to hear about all the QRP operation that is being done by FISTS members. In every issue of the Keynote, there are many mentions of QRP. If you are a new member of FISTS who is interested in QRP, and would like to read some of my past columns, they are all available on my web site at <http://www.geocities.com/CapeCanaveral/3852/>. There are many awards available for QRP operation. Our own FISTS club has two very fine awards, the QRP Century (I have award # 002), and the 2 way QRP Century (I have # 001). With the large number of FISTS now running QRP, these should be easier and easier to earn.

Several of the major awards are also honored with a QRP endorsement. The Worked All States from ARRL has such an endorsement, and is fairly easy to earn. It's an attractive award made even more so with the QRP sticker on it. Another popular award is Worked All Continents from the IARU and the ARRL. It is available from the ARRL, and can be endorsed for QRP operation.

One big award that is not endorsed for QRP is the DXCC. Why, I don't know. I have heard that ARRL has no way of proving that you actually operated QRP for the DXCC. Yet, they believe you for WAS and WAC. To use a currently popular phrase - go figure!

Of course, the QRP ARCI has many awards for QRP, as do some of the other QRP clubs. There are also other organizations that issue QRP awards. If you would like a listing of just about every ham radio award there is, you can contact my friend, **K1BV** whom I have known since the 60's when he was **K1GUD**, and we were involved in the county hunter's net together. He publishes an award directory, and would be glad to give you further info if you contact him via his callbook address, or via Email at k1bv@top.monad.net.

Larry, **KE8LF** writes via Email: "Enjoy reading your QRP article in 'KEYNOTE' I operate QRP also with a Argonaut 509. I really enjoy QRP. In the summer months I take my 509 with me to my camper. I use a long wire antenna thru a home brew tuner. Don't have any complaints of TVI. Everyone has an external TV antenna there. I also use a home brew vertical with base load coil on 20 meters." Good point about no TVI, Larry. That's true.

I also received a nice Email from **N1ODL**, but don't have room in this column. I'll get to it next column, and try to cover some of your comments as well. For now, 73 in '98. Write me at 478 E. High St., Kittanning, PA 16201-1304 or Email to johnshan@alltel.net -30-

FISTS QSL Bureau
By Stan Reas, K4UK

Thought I'd respond to some of the questions which have been E-mailed to me or enclosed with the SASE's and/or cards we have received.

Can I send you cards for QSO's with DX FISTS members?

Yes sir, echoing what George said in his ODDS N' ENDS column in the last Issue (12), send these cards to us. We periodically make a mailing to Bob Lowe, the OM who runs the FISTS QSL Bureau in England, of all the QSL's for DX stations on that side of the Atlantic.

Since we took over the Bureau, I've made mailings to Bob on: October 20, November 17, December 9 and December 30. So the cards will get over there pretty soon after I get them. Generally it takes 5-8 days to get from Moneta, VA to Bolton, England.

How about Canadian FISTS and DX FISTS on this side of the Atlantic?

We handle sending cards to these FISTS members. We do get SAE's from Canadians sometimes with U.S. stamps (if they can get them) or funds with which we can purchase U.S. stamps. Generally we get SAE's with IRC's from DX stations on this side of the Atlantic.

Should I send separate SASE's for my new call and my previous call?

No, you don't have to. But if you don't, please include both calls in the upper left hand corner of each SASE.

What should I put in the "return address" position on the SASE?

Please put your call sign in large letters in the normal return address position. We will put the FISTS QSL Bureau address below it. I generally stamp this address on when I get your SASE. If you want to use one of your return address labels, I suggest you put it on the flap on the rear of the envelope.

What is the number someone has put in the bottom left hand corner of my SASE?

I'm the "someone" who puts the number on your SASE. It's a sequential number starting with #1 on the first SASE we receive. I hope it helps you know how many cards are still in the Bureau. When we send out your last envelope we will note on the flap or in a note inside the envelope that it is: "The last envelope in Bureau"

How much postage should I put on the SASE?

For U.S. stations, one 32 cent stamp is needed for the first ounce. We can generally enclose 7 QSL cards in this envelope. Each additional ounce requires 23 cents more postage. So, for 55 cents postage we can generally send 15 QSL cards. For 78 cents postage we can generally send 23 QSL cards, Etc. If you put more than 32 cents on your SASE we will generally wait until there are cards roughly equivalent to the postage attached.

Can I have cards sent periodically?

Yes, just indicate next to your call sign how often you want us to send back your envelope, such as: (Monthly) or (5 cards). We will not send back an empty envelope - Hi!

To whom should I make out a check or money order if I send funds to the Bureau?

If you send money to the bureau, please make the checks out to Stan Reas, not FISTS CW Club or Franklin ARC. There isn't enough income to justify opening a checking account in FISTS name down near Stan's QTH, so Stan can't cash them. He has to send them to WZ8C, who in turn has to cash it then mail the funds back.

If you have additional questions as to how we are running your QSL Bureau let me know.

73, Stan - K4UK for the Franklin County ARC

RR Restoration Project Help Wanted

Chuck KB2E is on a local committee of volunteers to recreate the telegraph station in his Union RR station, which flourished from 1904 to 1965, and was served by both the New York Central and the Delaware & Hudson.

The project is being supervised by Historic Saranac Lake, which is a nonprofit, but is prepared to pay for any equipment that could reasonably have been in the telegraphers station in that time frame, such as scissors jack telephone, sounders, relays, etc. Soon there will be an excursion railroad of about ten miles from Saranac Lake to Lake Placid, site of the 1932 and 1980 Winter Olympics. If anybody has any of the appropriate gear, please let him know at 32 Glenwood Rd., Saranac Lake, NY 12983 or Brumloff@capital.net or 518-891-5704.

Louisiana Slow Net

Wads, **WB5CDX**, FISTS #2978 is the net manager of the Louisiana Slow Net. It meets Monday thru Friday on 3713 at 8:30 Central. He would like to invite all FISTS members as well as all CW operators to check in with them.

Nice News

Arley, **WB5NKC**, sends Welcome Messages to the new FISTS members. This is a copy of a message he received from a new FISTS. Traffic messages pay off in good feelings for both the senders and the recipients -- Join a traffic net and be a part of it!

Thank you for the welcome to FISTS - my family and I were sitting around, the phone rings, and first my son, then my wife say in a confused way, "Dad/Bill, it's some kind of message of from some radio guy".

Once I started talking to the fellow, it didn't take me long to realize he was sending on some traffic from a CW net. I was careful to get your call sign correct, and I thanked the fellow who called me, but I was so flabbergasted that I didn't get his name or call (I don't suppose you'd happen to know, would you?)

That was an unexpected treat and the first time I've ever received a message like that. Thanks again. 73, Bill Dumas /**KB0LAO**

FISTS Century Award Net (CAN)

Al, **W8FAX**, and Brian, **W8BL**, report that we now have NCS volunteers from all parts of the country. The schedule will be:

First Sunday	2000Z	14.058+/-	Al W8FAX
Second Sunday	"	"	Jim KC5VJU
Third Sunday	"	"	Brian W8BL
Fourth Sunday	"	"	Stan AC6TO

The Net can be found on Sundays on the frequency (QRG) 14.058 +/- QRM between 2000z-2200z. The net will be held weekly except on major contest weekends.

The stated purpose of this Net is for Fists members to work other Fists members, and to help those who are working toward their Century or any other awards attain their goals.

The NCS's look forward to your participation and extend their welcome to all members. We look forward to another great year, and hope all get a chance to participate in this activity.

Another type of CW Music

Kelly #2966 **N3XUJ** sang this song at her local radio club's Christmas party. She had a straight key strapped to her guitar, so keep in mind that anything between asterisks was sent with a key, not sung.

Oh, you'd better watch out. You'd better not cry.
You'd better not pout. I'm telling you why.

NCS is calling the net.

He sends *QNA* and *QNI*

He's gonna find out who's *QRT*

NCS is calling the net.

He's most happy to *QRS*

He knows if you are *QNY*

He knows if you've been *QRU*

So *QTC* for goodness sake!

Oh, you'd better watch out. You'd better not cry.
You'd better not pout. I'm telling you why.

NCS is calling the net.

Here is a photo of Kelly - if you look real close, you'll see a straight key attached to the top of her guitar! **KW4T** is holding the microphone.

Check-ins (QNI) for the first Sunday in January FISTS Century Award Net are **AF5Z**, **N1WL**, **KF1S/6**, **KC5VJU**, **AC6TO**, **WA1GAG**, **WZ8C**, **W8BL**, **WA6RND**, **N7CFA**. I hope everyone notices that I checked into the net - I actually DO make time to get on the air every once in a while, hi.

Going Mobile

Thought it about time I join the crowd and write something for the "Keynote". It's been over a year since I joined and the membership has about doubled, and no wonder, really a great bunch. I guess we share at least one thing, and that is a desire to communicate direct and to the point. Here's a quote of my own invention, "If you don't have much to say, say it in CW" (it applies to me anyway). This Christmas I had to drive to Boston, Mass., about 500 miles each way and it was so nice to be able to talk to some of my Fists friends while on the road and give them some more points as I was in different call areas. Worked Jim from 4, 3, 2 and 1 lands.

I also talked to:

Esther KA4IFF #11
Stan AC6TO #2696
Jim KC5VJU #2920
Gary WA4KQL #2534
Jack WB2FXK #918
Brian K8EY #1221
Grant K2ACW #2573
Leif OZ1EUO #3728
Bernie K2SWZ #748
Grant K2ACW #2573.

I guess I shouldn't have started this, I'm sure there are others that I have forgotten, please forgive me, I didn't do any logging. The hard part of /M CW is logging properly. I just got a batch of cards and there were 4 that I had missed.

P.S. I spent the last few days getting my cards ready to send out. Afraid to get on the radio for fear I'll run into a new Fist and have to fill out another card, HI. I H A T E P A P E R W O R K 73 Tom N3XT #2627

I'd like to second K4FWs comments in the Dec Keynote. Before putting an ICOM 735 in our car, I was one might term a 'competitive driver' on the morning commute. Worse than the wear and tear on the car, was that on me. I'd arrive at work mad at someone who, likely didn't even know that I was out there with him.

Not so since installing the radio, now I ease along in the right lane chatting away with someone new and interesting. Better still, I arrived at work feeling just as happy and relaxed as I did when I left the house.

And a side benefit - I used to have a terrible time with remembering names, call-signs, telephone numbers, etc. Over the years with mobile CW, I've seen my retention of such things increase hundred fold. 33 Geri N4GHI

Auxiliary Morse Characters

Chuck, KB2E, sends along these comments on the Dec Keynote article in which John, KSDL spoke about the other "auxiliary" characters used in Morse code that we don't ordinarily use.

"I remember when I first learned Morse making a list of the "missing" characters and wondering why they were missing. John mentions that there are six, but a very interesting book by Lewis Coe, called "Wireless Radio" lists seven, or maybe it's 12 if you count an additional five that are used in Russian, and use the Cyrillic alphabet. The six -- and I am not up to speed on the names of the punctuation that accompanies each letter, terms such as diacritical mark or umlaut or accent grave are just dim memories -- are the German A with two dots over it, dit-dah-dit-dah; the Spanish-Scandinavian A, with an accent mark, or a dot, over it, dit-dah-dah-dit-dah; the German-Spanish CH, dah-dah-dah-dah; the French E with an accent over it, dit-dit-dah-dit-dit, the Spanish N with that wavy line over it that we all know now because of the infamous El Nino, dah-dah-dit-dah-dah; the German O with two dots over it, dah-dah-dah-dit; and the German U with two dots over it, dit-dit-dah-dah. I won't attempt to describe the Russian characters -- even if I had them right in front of me, if I was working a Russian ham I wouldn't dare send them for fear they might be shorthand for "your mother wears Army boots."

"(Years ago when Krushchev was being such a pain and bullying our statesmen, one of our guys -- if not Dean Rusk, I'm close -- said to him, as Krushchev was being polite to the statesman and blaspheming the USA, "Remember the old Russian proverb, 'Don't praise me and spit on my mother,' and Krushchev said oh yes, sorry, I remember -- and our statesman had made it up! Hi!)

"Coe's book "Wireless Radio" hasn't gotten much attention, but it is a GEM, succinctly and informatively written. It's not just ham radio, but most hams would find it extremely interesting. Chapter heads include marine radio, amateur radio, point to point, on the move, military radio, cellular and satellite telephones, TV, police radio, wireless transmission of power, the Morse code, radar, and a couple of more.

I enjoyed that book so much I bought another one by him "The Telegraph, a history of Morse's invention and its predecessors in the United States." The books are available from McFarland & Co., Jefferson, NC. The two I have are bound in homely but serviceable library bindings: don't be put off by their somewhat drab appearance. Recommended

An Indoor Antenna Idea

By Tom, W1GO

The December KeyNote contained a story about **W8ROG** and **W08E** and their new condo and the antenna problem which Ken faces. I am an apartment dweller, too, and I know what he is up against. I live in a two-story building on the second floor of a 40-apartment complex and I have the distinct joy of listening to the horizontal deflection systems of 39 TV sets, assorted lamp dimmers, etc. It's not a great environment in which to operate. Further, we are not allowed any outside wires, even though I could string up about 150 feet of wire.

With the violent thunderstorms we have around here, I wouldn't want to be responsible for bringing some lightning into the building - might result in having to live on the street! So a couple years ago I set out to see what I could build to operate right in this bedroom. I finally came up with a half-wave loop for 20 meters. This antenna takes very little space, is fed with balanced feed line (no ground problems and "hot" equipment) and is quite efficient on 20 meters. It is usable on 40 and some other bands.

The basic half-wave loop is directional in its own plane - thus a half-wave horizontal loop is horizontally directive, unlike a full-wave loop which is directional perpendicular to its plane. In practice, the half-wave loop does show a slight azimuthal directivity in the direction opposite to the fed side, but this is only 2 or 3 dB.

This antenna is built from four pieces of 1/2 x 1/2 x 1/16 aluminum angle, 8 feet long, available at most hardware stores. The four sides are bolted together in a square pattern, with the fed side split in the middle for a feed by open wire line. The insulator here was made from a piece of 1/2-inch thick polyethylene cut from a kitchen cutting board. The antenna itself is hung from my bedroom ceiling using some plastic chain links found at a crafts store. I chose aluminum for its light weight, since the mounting to the ceiling is tricky if the weight is too great. I would have preferred copper tubing except for its weight. Each of the four corners is electrically reinforced with a 1/2 inch length of some 1 x 1 x 1/16 aluminum angle to provide extra conductivity to assure low resistance at each joined corner, extra important if 40-meter use is intended. Thus, each corner contains three bolts and nuts, one for joining the antenna elements and two more for the overlapping 1 x 1 angle. The antenna is suspended from the bedroom ceiling in seven places. If enough people are interested, I can supply some sketches of how I did it - it's really quite simple.

The antenna is fed with balanced line from a

tuner. This assures balanced feed currents and no residual RF wandering around on equipment cabinets. On 20 meters it presents a fairly high impedance to the tuner (as expected), and thus its efficiency is quite high. The RF losses in the antenna are very low. As for performance, I seem to be able to work anything I can hear on 20M and usually get reports that are equal to the report I give. The only problem is that I cannot operate my computer while on the air. At 100 watts, the RF field from the antenna is too intense and is only five feet above my keyboard and gets into the keyboard, generating about 18 interrupts per second until the stack overflows and the machine goes away. Fortunately, my little Super CMOS II keyer works just fine in this RF environment with no problems.

The antenna will load on 40 but is very inefficient. This loop is a quarter wave long on 40 and thus is a virtual short circuit (about 5 ohms or so). This is the reason for the corner reinforcement pieces. But it does get out in a ho-hum manner. I have worked KH6 on 40, however, so all is not lost. It will load nicely on the higher bands, but one must remember as you go up to the higher frequencies the directivity of the antenna changes until on 10 meters it is radiating straight up and down - not too useful. As a space-saving antenna, this one is a beaut - how many people use their ceiling for anything?

My best to you and the great FISTS gang, and may '98 be great". Tom, W1GO

SWR

Last month Jim **K5JAZ** wrote an article about setting up a station on a budget using a vertical antenna. Here is an explanation from Phil, **KE3FL**, about the SWR Jim reported with the antenna:

Jim set up his vertical and measured 2:1 on all bands. Then he moved his measurement to the shack and measured 1.3:1 on all bands and stated, "I don't know why, and don't really care,..."

Well, I agree and disagree. I agree that it won't change things now and so one doesn't need to care. He made sure his SWR was the required "2:1" in the antenna's specs, as measured at the antenna. And yes, the presence of his body in the near-field will make a difference. My small article just below his demonstrates another possibility, his 50 feet of coax. To find out just which contributes more, let's crunch the numbers...

Let's start with a feed line loss of -0.6 dB and a measurement of 1.3:1 SWR at the shack. What do the numbers say the SWR at the antenna will be? I

get only 1.35:1, even if we up the feed-line loss to -1.2 dB I only get an SWR at the antenna of 1.42:1 so the explanation is NOT 50 feet of good feed-line.

Jim is getting some very good SWR's from that antenna, and there are times when we should be concerned with SWR readings better than the manufacturer's specs. Let us all remember that one also gets very good SWR's from a good dummy load, but then we don't get DX QSO's with a dummy load, HI. The proof is in the pudding, and Jim's QSO's prove that the antenna is working well! Good article Jim, thanks! 73 de KE3FL Phil Karras

Holes In Plexiglass

In issue #8 K8UGL mentions using a heated awl or ice pick to melt holes in plastic. I just wanted him and others to know that there are special drill bits made for plexiglass. They are more tapered with a different spiral which cuts the plexiglass without burning it. If your local hardware store doesn't carry them, I'm sure they could order them. Bill, N3WST, FISTS 3028

You're My First CW Contact!

After teaching CW and Theory classes for over 40 years. I found that my students enjoyed trying CW but they were terrified at the thought of getting on the air. I would get on the air and try to be their first contact.

Since those days I have made a point to get on the novice bands and call CQ at very slow speeds or look around for a super slow CQ. It takes some time to understand what they are saying but once you get them going most do well.

How many guys do you know who have CW privileges and have never even had ONE contact? All most of them need is a station who will not runaway from them as show how fast they can send. I have gotten long letters from new people and even telephone calls from guys who thank me for going a speed they can get. Remember the days when you were just getting into the hobby and how hard it was to find a station going slowly enough to be copied.

Fast CW is fun but sometimes just helping new operators have their first contacts can be even more rewarding.

Art, W8PBO

PSE QSL!! A New Book

Bill Welsh, W6DDB, has written a book covering all aspects of QSLing, including QSL design and selection, how to use QSL Bureaus, QSL managers, QSLing direct to foreign countries, sources of foreign postage and much more. Pse QSL! is 70 pages long, with 15 illustrations and several extremely useful lists. Size is 8.5" by 11". It lists for \$12.95, but Bill has copies available to FISTS members for \$7 including shipping. To order send check or money order to Bill Welsh, 45527 3rd Street East, Lancaster CA 93535-1802

Now, THAT'S a Ragchew!

With all the comments I've been getting about how FISTS is becoming just a number chasing group, this letter from John was a pleasure to read:

"Here is some information to stir up pride, interest, or even disbelief with respect to CW accomplishments. To all FISTS members I ask: "What is your longest, single station contact?" I have a 30-meter log entry dated 1 January 1996 detailing a continuous straight key conversation with a Canadian chap that lasted three hours."

"In 37 years of pounding brass, I never acquired the proper touch for a keyer nor one those typewriter like buttons devices that enter data to a computer. John, WA2NZO, #3684 48th AHC/USARVN '66

I wrote back to John and asked him for details about the QSO, if he remembered if it was QRQ or QRS, QRM, etc. He replied:

"Never really checked my speed because band conditions, fatigue, and an incoming signal work to throttle my fist. Only once did I forsake slow speed to run wildly with the demon key they call Speed-X. It started out as one of those god-awful nights filled with a stillness on 40 and 20. I flipped to 15 when all of a sudden the ether exploded with a loud CQ. He was fast and you could tell by his rhythm that a keyer formed his characters."

"Bored from the stillness before and knowing that this was the best the evening had to offer, I slowly answered his call. He acknowledged me and said that I had reached a Naval Air Station. I tapped out my reply suggesting that he slow down to swap more information. He returned like a crusty old crab ordering me to send at his speed or terminate the contact. I rigidly fixed my fingers on the knob of that straight key and spat upon its bearings to get more WPM. If he sent at 25, I pounded back with 27. We dueled on until there was nothing more to send while listeners eased back on their eardrums that were stretched out to tell the difference between the keyer and the straight key called Speed-X.

What a neat way to describe a QSO John, I could almost feel like I was there! Thanks for sharing.

This is a copy of the transcription of the last Great Britain transmission as they signed off from monitoring the 500 kHz frequency. It was sent in by **KB7AQD**, transcribed by **G3TUX**.

As most of already know, GB ceased its watch on the 500 kHz international (CW) distress frequency at midnight last night, 31st December 1997.

I patched a cassette recorder into my FT900 tuned to 500 kHz and have just transcribed the following.....

(at 2349 UTC Portpatrick Radio GPK was first to sign off)
CQ CQ de GPK GPK. At 31.2359 UTC Portpatrick Radio/GPK will end the H24H 500kHz distress watch after 76 years. In 1844 QTC nr 1 fm Samuel Morse was <What hath God wrought?>. All R/Os now ken the answer to this. NW 73 73 /Slainte to all R/Os, past and present - fare well. AR de GPK GPK VA

(next was Wick Radio/GKR)

CQ CQ CQ de GKR GKR GKR. After almost 90 years serving seafarers this is the final w/t broadcast from Wick Radio. For the few of us who are left it is with feelings of pride and nostalgia we remember friends and colleagues at sea and ashore and the service was rendered particularly to the then mighty distant water fishing fleet. Technology however marches on and as we find ourselves and our service consigned if not to the museum then certainly to the pages of history. All that remains..... < at this point a strong TFC broadcast from IAR (!) rendered copy impossible>best wishes for 1998 and 73s to any who are left on the sea with the ability to read this.....<at this point GLD transmitted an acknowledgment to GKR before the latter had finished sending - I think he was trying to hurry things along!>

(next from Cullercoats/GCC)

CQ CQ CQ de GCC GCC GCC. Here is the last w/t transmission from GCC. A fond farewell from Geordy-land. Sent with a sad and shaking hand. For many years with signs we spoke and now it all goes up in smoke. So thanks and all the very best as GCC is laid to rest. De GCC/GND 010000Z AR AR BB de GND

(Finally, at approx 0017 UTC)

GLD de GCC. Over to you and best wishes to u and all listeners AR VA de GLD R Mni tks.

CQ CQ de GLD GLD. This is the final w/t transmis-

sion from Lands End Radio. Since 1901 GLD has listened continuously on 500 kHz and is proud to have assisted many ships in distress both in peace time and in war. But now the time has come - ours is not to reason why - the satellites are calling, our Morse transmitters die. Marconi if you can hear us we salute you. de GLD 31/12/97 2359z AR AR de GLD

My tape ran out at about 0030z when GLD was still acknowledging calls from other watchkeepers. Call-sign logged included EAC, EAS EJK, EJM, IAR, OST, OXZ, SAA, SPA, SPE and VCM.

Thus another era comes to an end. The Morse was all hand sent and frequently showed the emotion of the occasion. Vy 73 and HNY to all, Chris G3TUX

Robert KB7AQD comments: Sounds like the maritime version of Michael Crichton's "Westworld" and "Jurassic Park". As long as all the high tech rigs work PERFECTLY, ships are safe. But, as we radio amateurs know, nothing works perfectly, especially during a disaster.

This provides a great chance to promote FISTS and CW operations. FISTS with 500 kHz receive capabilities should take a few minutes a night on top of the hour to DX on 500 kHz CW. Send each ship and shore station a QSL report letting them know that someone else is indeed listening.

Some of our FISTS homebrewers and kitmakers may want to design a portable "Field Day" style 500 kHz IC receiver with a small loop antenna and a narrow CW passband so that we can go on 500 kHz DX peditions to monitor the routine traffic and - I hope -- rare distress call. It takes no license to monitor, and we could assist in discovering a weak call for help, and relay the sad news to the proper authorities.

Along this same topic is a proposal written by Greg **W8XP**:

At the outset amateur radio was given radio spectrum to use for the good of everyone. From that simple gift an incredible communications infrastructure arose. With only a small outlay of time and money by the federal government and the people of this country, guidelines were set and formed operating rules. Now a small portion of the FCC's budget is used in the name of amateur radio to administer those frequencies. Beyond that, the balance of money, time, and experimentation is spent by the individuals who participate in amateur radio. It is mind boggling to think

of the size of this incredible communications miracle, with all it has to offer. Literally everyone wins, the participants and the public alike.

My proposal is, for bands that will retain the use of CW and other digital modes for emergency communications, primarily for what has been lost at 500 kHz serving maritime emergency traffic. I propose 2 new bands in the HF spectrum; 1 in the vicinity of 5 MHz and the other at about 12 MHz. The propagation characteristics of these 2 bands should supply long and short range communications 24 hours a day. The higher frequency will also allow for smaller antennas that can be used more readily in portable and mobile applications. If amateurs can have access to frequencies that will also be used by maritime, these frequencies will be monitored continually for emergency distress signals.

Using CW on these bands will once again provide the one basic mode of communication that has proven itself for over 90 years in sending and receiving distress signals to someone who can help. CW is the one mode that will get a signal out with the minimum amount of equipment and power source, which in some emergency situations minimal equipment and power is the only thing left to use. Digital modes could also be used to attain a volume of information where needed or desired, while still keeping the bandwidth and power requirements to a minimum. The fact that the most basic of radios can be used with the natural ionosphere to bounce the signals back to earth at very low power settings, makes this an extremely reliable and timeless way to save lives and property. It will also be an additional incentive for more of the amateur community to participate and advance with these modes of communication. In addition to that, equipment, antennas, and propagation of these frequencies will be explored to the extreme.

For all the nations and corporations that provide for the monitoring of emergency traffic, this proposal should give them a mechanism to fill any potential gaps that may come to light in their infrastructure. Of course it will be kept on an amateur level with regard to no commercial traffic being passed on these new bands. In a world where liability concerns are paramount, this would be a huge asset for everyone concerned. The world is becoming a very busy place with many lives to protect, many additional environmental concerns. This makes it easy to embrace additional protection. Think of this proposal as a free insurance policy. Keep in mind this is not a primary source of communications. Just like all other amateur traffic, the amateur radio operator's job to handle emergency traffic begins when the primary communication in-

frastructure cannot do it's job. It would be the same for these new bands.

To achieve this new additional coverage it will require only a few hundred kHz for each band that I propose. This is the same proven process that gave us today's amateur radio infrastructure. Just think of the new international friendships and trusts that will be established in the process of operating and establishing these new bands. Greg W8XP FISTS #1977

Fiction or Forecast

By Ed NC5S

Please don't take this as another biased and rabid argument for (or against) continuing the Morse code requirement. This is not meant to be more vitriol. I am just trying to prepare all us practitioners of the dark art of CW to accept the inevitable. After all, Morse code is pretty old-fashioned technology. It is an arcane art mastered by only an elite few. There are many more efficient modes than CW, and CW holds back the progress of Ham Radio technology since it doesn't require upgraded protocols and hardware/software implementation every few years. It is not fair to force those with no interest in this outdated art to master a skill that it literally takes weeks of hard study to learn.

A lot of new hams are intimidated by the code, realizing what a useless but insurmountable obstacle it is, and so the code requirement has not only kept new blood from getting into the hobby, but it has also kept Technicians with a lot of time and money invested in Amateur Radio from progressing. We need new blood into the hobby, and we can't afford to let us elitist traditionalists stand in the way of progress. I therefore back down from my previous position that the CW requirement must stay in effect. However, we must prepare ourselves for the consequences of dropping CW.

When (not "IF" ... the day will come. the question is WHEN) the code requirement is abolished, how many new hams will bother to learn the code? About the same number who build their own rigs now, i think. After 15 or 20 years, the majority of even Extra class licensees will be no-coders. Once they are a not so silent majority, somebody is gonna wake up to the situation with the overcrowded fone bands vs the still peaceful non-fone bands and say "Hey! That outmoded old CW stuff went out the window back when the Coast Guard stopped guarding 500Kc! The FCC finally acknowledged it when they dropped the code requirement and I could get a license, too. We still got these old foot-dragging, progress-hating brass-mashers hogging up all the good spectrum. Let's get it!" Then the feds will bow to popular opinion and

open all the bands up to fone ops once and for all. After all, the majority will be in favor of it, and treaties be damned. I am uncomfortable with the idea of hearing fone guys complaining about my beedly-beeps interfering with their QSO on 14010. But I guess I'll just have to roll with the tide and become a mic worshipper too. I'll make a nice plaque for mounting my favorite key on. It will make a nice display, adding a touch of old-fashioned charm to the shack.

With the bands completely opened up, I predict an increase in the number of ops who memorized the questions to pass their license exam and really don't know too much except maybe where the band edges are and how to trim a dipole. When we have reached this point, by and large we WILL be just cb-ers who can install our own equipment without help.

When we have reached THIS point, may as well not have an exam at all. Many clear thinkers of that day to come will insist that the testing requirement is totally irrelevant, as are multiple classes of license, since anybody can memorize enough to pass whatever level of license they desire. The majority will see the logic, and the feds will be forced to act again for the betterment of the hobby after dragging their foot for a few years. RTTY, AMTOR, Packet, and all the other data modes along with CW transmissions, will be outlawed. Data is more efficiently transmitted over the internet anyway, and the modes will just require too many old-fashioned, antiquated skills. Finally, all those interfering "beedle-beedle-beedle" and cricket chirping sounds will be eliminated, and it will be just talk, talk, talk. That complicated stuff has no more relevance in modern communications than spark! Want nostalgia? Get a jungle drum.

Mail-in no-test licensing will be convenient, and popular, and will bring in hundreds of thousands of new hams. Finally, the amateur bands are almost as free as God intended them to be! Freedom to express yourself, freedom of speech, long repressed on the bands, will be joyously celebrated by the down-trodden who have fought all the long years to throw off the heavy hand of the FCC and those hateful, elitist pro-exam nuts. The QRP homebrewer fanatics will be silenced by a very sensible law requiring all equipment used on the air be type-accepted, i.e. made in a factory where the manufacturer can ensure that no skill is needed to get on the air and talk, talk, talk. Band selection should be automatic, and power level set at the maximum the built-in power supply can handle. An HF all-bander will have a thousand preset simplex channels for the auto-propagation channel-picker-outer to choose from. The only user-adjustable control will be the on/off switch, the "volume" knob,

and the push-buttons for background music and sound effects.

Finally the big day will come. The courts will recognize that everybody, licensed or not, is entitled to equal use of the amateur bands. FCC licenses will continue to be proudly displayed by the old-timers who had to take a 10 question true/false test to earn them. The same old-timers will collect such curiosities as Voltmeters, grid dip meters, oscilloscopes, soldering irons, and the like, and as they die the newest craze, collecting antique ham gear from the pre-freedom days will take off. The FCC, in alarm, will impose heavy fines on possession of old fully user-adjustable transceivers and transmitters that have not had their finals removed and connectors filled with a type-accepted epoxy based compound at an authorized factory.

New employment opportunities will open up for practitioners of the dark arts. There will be a big demand for technicians who know how to plug everything together and make it work. These radio experts will take care of all the really mysterious stuff like installing a station GND, whatever the hell that stands for, and connecting an antenna properly. Once the radio nerd is done, paid, and gone, the proud station owner will have a station capable of transmitting a signal clear to the other side of the globe... of course with all the QRM nobody will understand the words, but it will still be comforting to know that one's voice can help contribute to the joyous unintelligible babble all the way in Ulan Bator. Radio will truly be making the world a smaller, friendlier place!

Finally, the day will come when some ham, browsing through an antique ham radio shoppe will see a dusty old set, one of the really old ones ordered disabled by the FCC because the continuously variable tuning permitted off-channel transmission. The ham of the day will notice an opening on the back panel cryptically labeled "KEY", and wonder why the ancient, long dead owner though it was necessary to lock up his AB.

FINAL

A late breaking bit of news from Geo G3ZQS. The DX FISTS are sponsoring a Winter Straight Key Week from Sunday, 1 Feb to Saturday 7 Feb (0001utc to 2359utc). North Americans are welcome to join in, but will be in a separate category, since we have a "higher density of potential contacts" to draw from than the DX FISTS do (Geo's words, not mine!) I was told about this contest too late to do any publicising on it, or even get it in the Key-note in a timely fashion, but I wanted to let you know what's going on in case you hear some CQ SKW's on the bands. 73 88 and Happy Valentine's Day! Nancy WZ8C

**The International Morse Preservation Society
and
FISTS C.W. CLUB**

Dear _____,

You have been sponsored for membership of the above club and it is my great pleasure to enclose herewith the membership application form.

There has long been a demand for an organizations such as this not only to fill the void left by the declining numbers of ex-professional operators but to nurture the interests of those who are drawn to the mode but lack the operating skills. It's just these Amateurs who would otherwise be tempted to exchange the key for a microphone if the satisfactions and pleasure of Morse were to be denied them by a lack of opportunity. Such opportunity is rare when one is a beginner and the bands appear to be populated by c.w. signals which are well beyond their limited skills.

FISTS is peopled by those whose love of Morse has urged them on to encourage the beginner, to dispel those initial moments of fear and help them reach out for a joy known only to a small minority of Radio Amateurs.

A love of MORSE and a concern for its perpetuation are the only requisites for membership. There is no specific speed requirement and neither is membership of the RSGB or other National body demanded. The aims of the club are:

- a) To further the use of Morse Code on the bands
- b) To encourage the newcomer to the mode
- c) To engender friendships within the membership

You will appreciate that in order to effect these goals, the club must render itself open to the novice operator and have a healthy sprinkling of Veterans to encourage them.

Your subs are due on the anniversary of the month in which you joined. There will be approximately 12 newsletters per year which will depend largely on your own contributions and you are encouraged to offer comments and observations.

We have our own QSL bureau which distributes members cards free as far as is possible and members may also chose to adopt the club QSL card.

In addition, we have a talking newsletter for those who are visually handicapped.

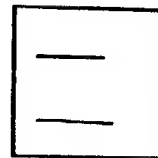

One of the greatest spin-offs of a club of this nature is the firm and lasting friendships which are a direct result of membership and consequent on-air contacts. You are encouraged not only to meet other members on the air but, if the opportunity is there, on a Social basis also. Should you wish to invite your current friends to join the club, you are at liberty to nominate them bearing in mind the criteria mentioned above.

We look forward to receiving your reply.

73 de *Geo* G3ZQS

FISTS C.W. Club

Membership Application Form

Callsign_____ Name on the Air_____

Mailing Name and Address:

The following info provides a synopsis of members' working conditions:

Rig(s)_____

Antennas_____

Other club affiliations (ARRL, RSGB, etc)_____

Other interests_____

Birthdate_____ Phone_____

Are you visually handicapped?_____

Email address (if applicable) _____

Packet address (if applicable)_____

Date_____ Your sponsor (if applicable)_____

Signature_____

Please enclose annual subs of \$15 (U.S. funds)

Please make checks payable to FISTS CW club and return to:
Nancy Kott WZ8C, POB 47, Hadley MI 48440-0047 USA

HOW DO I...

...ORDER CLUB SUPPLIES? Irene WO8E 44609 N. Bunker Hill Dr. Clinton Twp, MI 48038 has gold logo stickers, 200 for \$5; Blue enamel/gold metal clasp-back logo pins \$3.50; Cloth logo patches 3" octagon shaped \$1.50 Rubber stamps with the FISTS logo for use with an ink pad (not included) for \$5. "I Support KNOW Code" buttons for .75 FISTS Logo mugs are currently out of stock. These prices DO include first class postage.

...GET AN UP-TO-DATE MEMBERLIST? The list is printed in the KeyNote twice a year and is also on the Web page. A printed updated list may be obtained by sending \$1 (to defray costs- it's 10 pages long) to Ed N7CFA 2628 Lilac Street, Longview WA 98632. Corrections to Ed at n7cfa@kalama.com

...GET ON THE FISTS ON-LINE Email LIST? Send your Email address with your name/call/ FISTS number to blafont@tir.com

...GET/SEND FISTS QSL CARDS Via BURO? Stan K4UK, with the assistance of the Franklin County Amateur Radio Club handles FISTS QSL bureau. Sort your outgoing FISTS cards by call area, then alphabetically and mail to K4UK, 1020 Long Island Dr, Moneta VA 24121. To receive cards you may have waiting at the bureau, send K4UK a few SASEs. QSLs will NOT be sent to you unless you have sent in an SASE or made arrangements with Stan. His Email is stanreas@rev.net

...RENEW MY KEYNOTE SUBSCRIPTION? Send a check/M.O. made out to FISTS for \$15/year to Nancy WZ8C POBox 47 Hadley MI 48440. **What's the Family Plan?** All CW folks at the same QTH can belong to FISTS for one subscription fee of \$15. You will each have your own FISTS number, but only one Keynote will be mailed per address. Student rate = \$10 if not in a Family Plan.

...SPONSOR A DX FISTS? DX FISTS have a separate block of numbers; their Keynote is mailed from Geo G3ZQS. Send their info to Geo 119 Cemetery Rd, Darwen Lancs, BB3 2LZ; he'll send them a DX application.

...HAVE AN APPLICATION OR NEWSLETTER SAMPLE SENT TO FRIENDS? Send their address Joe K5HLR 29 Melrose Dr, Marrero LA, 70072. Pse enclose \$1 if sample Keynote is requested. An application is also available, in text format, for downloading on our Web page <http://www.FISTS.org>

...APPLY FOR THE CENTURY or WAS AWARD? Send a list of contacts (call, FISTS #, date, band) and power used to Joe N3LBC, 222 E Bertsch St, Lansford PA 18232. Don't submit QSLs. There is no charge to FISTS members for the regular Century Award. If you are applying for the Golden/Diamond Century or the Platinum, send your request directly to HQ in England (119 Cemetery Rd, Darwen Lancs England BB3 2LZ) including sufficient return postage.

...VOLUNTEER FOR or GET A CODE BUDDY? Ed WA3WSJ 775 Moonflower Reading PA 19606

...SHARE COMPUTER SOFTWARE? Joe WZ8U 5428 Bolander Grand Blanc MI 48439

...GET MY PHOTO ON THE PHOTOPAGES? Send a snapshot of yourself to Ken W8ROG 44609 N. Bunker Hill Dr. Clinton Twp, MI 48038

...GET A COPY OF FISTS PRESENTATION to give at my local club meeting? This program is currently suspended until another volunteer is found to over the mailing/tracking of the presentation kits!

...FIND THE WEB PAGE? <http://www.FISTS.org>

...SUGGEST IDEAS FOR THE WEB PAGE? Contact Bill KK4KF at bjmyers@arc.net

...ORDER FISTS CLUB QSL CARDS? send SASE to WX9X at 354 West St, Valparaiso IN 46383

...ORDER A FISTS CLUB ID BADGE? Our club badge is dark blue, with FISTS logo in gold and your name, FISTS number, call sign and "Int'l Morse Preservation Society" in white. They are \$6.95 post-paid from The Signman of Baton Rouge 879 Castle Kirk Dr, Baton Rouge LA 70808; email nv5a@aol.com

A non-engraved, laminated club badge is available from Bruce Eichmann W2BE, 204 E. Lake Blvd, Medford NJ 08055. Cost is \$4.75, NJ residents \$5.00 because of tax.

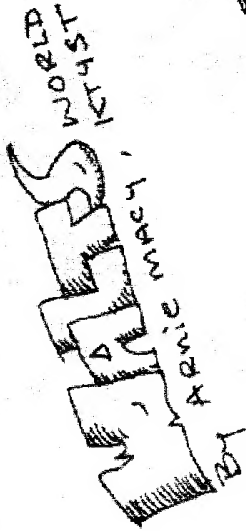

...IMPROVE MY CODE SPEED and MEET LOTS OF NEW FRIENDS? Join FISTS! Get involved in the nets and activities!

The Keynote is published approximately monthly by Nancy Kott WZ8C, P. O. Box 47, Hadley MI 48440-0047
Email: nancy@tir.com WZ8C reserves the right to edit submissions for space, clarity and topic suitability. Comments not attributed to another are written by WZ8C. Articles from The Keynote may be reprinted if credit is given to the original author.

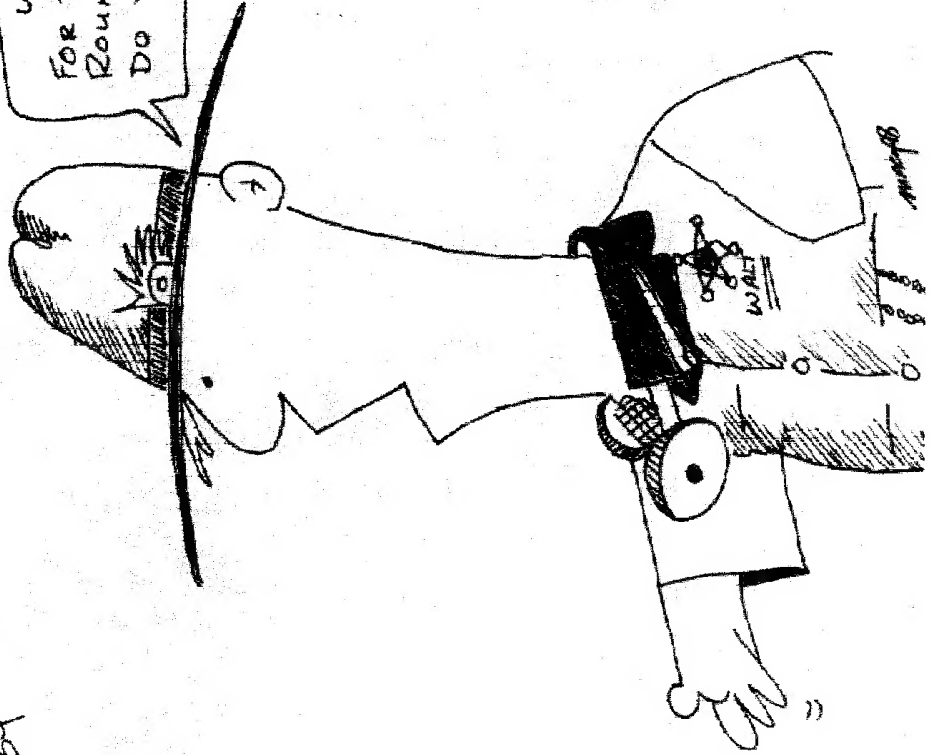

FISTS CW CLUB, P.O. Box 47
Hadley MI 48440-0047

Your renewal due date and FISTS number are
on the mailing label.
